DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 5, 2006 has been entered.

Response to Amendment

2. The amendment July 5, 2006 has been entered and considered. Previous amendments cancelled Claims 1 – 54 are cancelled in the current amendment. No claims were added and Claims 55, 58, and 59 were amended. Thus, the currently pending claims considered below remain Claims 55 - 59.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 55 - 59 are rejected under 35 U.S.C. 102(e) as being anticipated by Agarwal et al (6,509,910).

Claim 55: Agarwal discloses an apparatus for providing image displaying services comprising:

Response to Arguments

5. Applicant's arguments filed July 5, 2006 have been fully considered but they are not persuasive. The applicant argues that the Agarwal patent does not disclose or suggest receiving two kinds of advertising information, wherein the local advertising information corresponds to the place at which a user terminal is hosted and is received from a first advertiser entity, and wherein the widespread advertising information is received from a second advertiser entity, received via a portal, and is shared between a plurality of apparatuses. However, the applicants specification indicates that the means for receiving both the local and widespread advertising is the same device (Host Server 104) and differentiation is provided as to how the host server 104 processes and displays these advertisements is disclosed (Applicant's specification: Page 9 lines 23 – Page 10, line 7). The only disclosed difference between local and widespread advertisement disclosed is that the Advertiser makes a decision independent of the disclosed invention as to whether to send the advertising information to one or multiple host servers. Therefore, Agarwal does teach the receipt of information from a remote source (See rejected section above) regardless of whether the advertiser has sent this information to other sources.
